I am writing to apply for the Founding Full Stack Engineer Local AI Infrastructure role at Lokalaise GmbH. Your focus on deploying AI inside customer-controlled environments, connecting to internal knowledge bases, and maintaining strict data privacy is exactly the kind of infrastructure challenge I want to work on. The idea of building a repeatable product from early deployments in a small, founder-led team is something I find genuinely compelling.

My background combines full-stack web development with practical AI integration work. Over the past four years, I have built production applications using Laravel, Next.js, React, TypeScript, Node.js, and PostgreSQL, and I have also worked directly with AI models and APIs. This combination allows me to contribute across your stack, from building secure data connectors and permission-aware retrieval systems to optimizing local inference pipelines.

In my professional experience as a Web Developer at Explo-IT, I designed and developed scalable web applications, built RESTful APIs, implemented authentication and role-based access control, and deployed applications on Linux servers using Docker and Nginx. I also delivered real-time features with WebSockets and integrated third-party services including payment gateways and cloud storage. These skills map directly to building the secure, permission-aware infrastructure your platform requires.

One project that closely relates to your work is the AI Powered Real Estate application, where I integrated OpenAI and Replicate APIs to build AI assistants and process images, implemented role-based authentication and subscription plans, and connected Stripe for payments. This experience taught me how to combine AI capabilities with production-grade backend systems while maintaining security and performance.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Lokalaise’s mission of building secure, local AI infrastructure.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
