I am writing to apply for the Pedagogy Specialist Spanish position at CloudFactory. Your mission to combine advanced technology with human expertise to make AI inference reliable and trustworthy aligns with my own approach to building practical, real-world systems.

Although my professional background is in software engineering, I have developed strong analytical and evaluative skills through hands-on project work. In my experience building AI-powered applications, I have worked extensively with datasets, trained AI assistants using curated content, and reviewed output quality to ensure accuracy and relevance. This process required careful error analysis, attention to detail, and the ability to connect individual data points to broader system goals.

One area that particularly interests me is the use of learner data to drive continuous improvement of educational content. In my project work, I have designed systems that collect user interaction data and feed it back into the model training pipeline, creating a loop of ongoing refinement. This experience has given me a practical understanding of how structured content, quality review, and data-driven iteration work together to produce better outcomes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my skills can contribute to CloudFactory’s mission.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
