I am writing to apply for the File Clerk position at Recruitlytic Hiring. The role's focus on maintaining accurate, organized, and compliant digital records aligns with my disciplined approach to managing information and systems.

Through my work as a software engineer, I have developed a strong foundation in file management, version control, and data organization. I am comfortable working with cloud storage platforms like Google Drive and SharePoint, document tools such as Adobe Acrobat, and spreadsheets for tracking and reporting. I follow naming conventions and folder structures consistently to ensure files are easy to locate and audit-ready.

One area that particularly interests me is the quality control aspect of this role. In my previous projects, I performed regular checks for duplicates, missing data, and formatting errors. I am accustomed to flagging exceptions, maintaining error logs, and contributing to process improvements that reduce rework. I understand the importance of accuracy and confidentiality when handling sensitive records.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my organizational skills and attention to detail can support the Recruitlytic Hiring team.
