I am writing to express my interest in joining Germain Hˆ·tels through this spontaneous application. As a full-stack and AI engineer with experience building scalable web applications, I am drawn to the hospitality industry's need for reliable, user-friendly digital systems that enhance guest experiences and operational efficiency.

My technical background centers on full-stack development using Laravel, Next.js, React, Node.js, and MySQL. I have built authentication systems, RESTful APIs, responsive interfaces, and real-time features in production environments. I also work with Docker, Nginx, and Linux servers for deployment and maintenance.

In my professional experience as a Web Developer at Explo-IT, I designed and developed scalable applications using Laravel and Next.js, integrated RESTful APIs, implemented role-based access control and secure payment gateways, and optimized database performance through query tuning and caching. I also delivered real-time features using WebSockets and deployed applications on Linux servers with CI/CD pipelines.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV and cover letter for your review. Thank you for considering my application, and I would welcome the opportunity to discuss how I could contribute to Germain Hˆ·tels.
