I am writing to apply for the Content & Marketing Manager E-Commerce position at LouMaxx GmbH. Your focus on functional, honest products and a small, hands-on team appeals to me. I am drawn to the opportunity to build new channels from the ground up rather than simply managing existing ones.

My background is in full-stack software engineering, but I have consistently worked at the intersection of technology and visual communication. Designing user interfaces for web and mobile applications has given me a strong eye for visual quality, layout, and what makes people click. I am comfortable using Photoshop and Canva to finalize creative assets, and I actively use AI tools to speed up design and content workflows.

One area where I can contribute immediately is in using AI to optimize image concepts and A+ Content for conversion. I have practical experience integrating AI APIs into production systems, and I know how to apply these tools practically to save time and improve results. I also bring a builder's mindset: I enjoy setting up new systems from scratch, whether that is a social media presence, a newsletter workflow, or an owned e-commerce channel.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my hands-on approach and technical background can support LouMaxx's growth.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
