I am writing to apply for the Senior Performance Marketing Manager position at WhereverSIM. Your work in providing reliable IoT connectivity across industries like smart appliances and connected vehicles is genuinely interesting, and I appreciate the focus on data-driven growth rather than surface-level metrics.

My professional background is in software engineering, where I have spent over four years building full-stack web applications and data-driven systems. Through this work, I have developed a strong analytical mindset and the ability to extract meaningful patterns from complex datasets. I am comfortable working with reporting tools, CRM data, and automation pipelines to drive decisions.

One area that particularly interests me is the challenge of measuring success along complex customer journeys. In previous projects, I have built real-time monitoring dashboards and analytics systems that track user behavior from initial engagement through conversion. I am experienced in identifying bottlenecks, testing hypotheses, and scaling what works.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and technical skills could contribute to WhereverSIM’s growth.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
