I am writing to apply for the Senior Sales Manager BKO position at Kloepfel Group. While my professional background is in software engineering and AI systems, I bring a strong foundation in analytical problem-solving, client communication, and delivering complex projects in international environments.

In my previous roles as a Web Developer, I worked directly with stakeholders to understand business needs, translate requirements into technical solutions, and manage project delivery from start to finish. This experience has given me the ability to communicate clearly with decision-makers, present technical concepts to non-technical audiences, and build lasting professional relationships.

One area that particularly interests me about Kloepfel Group is the focus on procurement and cost management consulting for mid-sized enterprises and corporations. I am drawn to environments where analytical thinking, structured problem-solving, and client-facing collaboration are central to success.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in technology-driven project delivery and client collaboration can contribute to Kloepfel Group’s sales team.

Sincerely,

Md Shahanur Islam Shagor
