I am writing to apply for the Marketing-Allrounder position at TR31 Ventures GmbH. The opportunity to actively shape and develop multiple companies across different brands appeals to me, and I appreciate the emphasis on taking responsibility and bringing ideas to life.

My professional background includes over four years of web development experience, where I have focused on building, maintaining, and optimizing websites. This directly relates to your need for someone who can care for and further develop your companies' web presences. I have a strong eye for detail and can identify errors and improvement potential on websites, ensuring they remain effective and professional.

In my previous roles, I have worked with technologies like Laravel, Next.js, and Tailwind CSS to create responsive, user-friendly interfaces. I have also integrated third-party services and optimized application performance. This technical foundation allows me to manage website updates, troubleshoot issues, and implement new features independently.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I would welcome the chance to discuss how my skills can contribute to the growth and visibility of your companies. My CV is attached for your review.

Sincerely,

Md Shahanur Islam Shagor
