I am writing to apply for the Technische Leitung position at Franke + Pahl Fachkr^fte GmbH. The opportunity to take technical ownership, lead a team, and drive product and process improvements in an international industrial environment aligns with my professional experience and career direction.

My technical background is in software engineering, where I have worked across the full stack using Laravel, Next.js, Node.js, and React. Over the past four years, I have delivered production applications, built RESTful APIs, implemented authentication and role-based access control, and deployed systems on Linux servers using Docker and CI/CD pipelines. I have experience coordinating technical projects from planning through deployment, working closely with stakeholders to identify improvements and deliver reliable solutions.

In my previous role at Explo-IT, I led the development of scalable web applications and collaborated with engineering teams and business stakeholders. I was responsible for optimizing application performance through query tuning and caching strategies, integrating third-party services including payment gateways and cloud storage, and ensuring smooth deployment and maintenance on Nginx and Apache servers. This experience has given me a practical understanding of managing technical workflows and delivering results in a team environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my technical leadership and project management experience can contribute to the continued success of your team.

Sincerely,

Md Shahanur Islam Shagor
