I am writing to apply for the Fachkraft fˆ…r Personalmanagement position at Plenus Care GmbH. Your focus on providing personalized, high-quality intensive care in patients' own homes, supported by digital tools like iPad documentation and real-time physician access, is a modern and human-centered approach that I find genuinely compelling.

My professional background is in software engineering, where I have spent over four years building and optimizing digital systems. This experience has given me a strong foundation in structured thinking, process design, data accuracy, and the ability to manage complex workflows with multiple moving parts. I am comfortable working independently, taking ownership of tasks, and ensuring that every detail is handled correctly.

One area that particularly interests me is the digitalization and continuous improvement of HR processes mentioned in your description. In my previous work, I have been directly involved in optimizing workflows, implementing new tools, and ensuring that systems operate reliably and efficiently. I approach process improvements with a practical, solution-oriented mindset and am confident I can contribute to streamlining your HR operations.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills in organization, process optimization, and reliable execution can support your team in Oberhausen.

Sincerely,

Md Shahanur Islam Shagor
