I am writing to apply for the Copywriter Corporate Communications position at Bikeleasing-Service GmbH & Co. KG. Your focus on clear, consistent, and brand-aligned communication across internal and external channels is something I find genuinely compelling, particularly as you integrate AI tools into modern text workflows.

Although my primary expertise is in software engineering, I bring a strong command of English (C1-C2 level) and practical experience using AI tools to produce and refine content. In my development work, I have used OpenAI and Replicate API to generate text variants, train AI assistants, and automate content workflows. I understand how to use AI as a support tool to improve efficiency and quality without replacing editorial judgment.

One area that particularly interests me is translating complex topics into clear, effective messages for different audiences. In my professional experience as a Web Developer, I regularly communicated technical decisions and project updates to stakeholders across sales, operations, and customer service teams. This required adapting my language to suit each audience while maintaining accuracy and clarity.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
