I am writing to apply for the Senior Full Stack Developer role at Gratitude Jobs Ahead HR INC. Your focus on building modern web applications with JavaScript, TypeScript, and React aligns directly with my core technical experience and the type of work I enjoy most.

Over the past four years, I have worked professionally as a full-stack web developer, building and maintaining production applications using JavaScript, TypeScript, React, Next.js, and Node.js. I have designed responsive UIs, integrated backend APIs, and worked with databases like MySQL and PostgreSQL. I also have hands-on experience with HTML, CSS, Tailwind CSS, Git, and deployment tools like Docker and AWS.

In previous roles, I developed scalable web applications using Laravel and Next.js, built RESTful APIs, implemented authentication and role-based access control, and optimized performance through query tuning and caching. I have also collaborated with designers and developers to deliver high-quality products and participated in code reviews to maintain best practices.

One project that reflects this experience is the Travel Agency App, where I built the frontend with Next.js, TypeScript, and Tailwind CSS, and developed the backend API using NestJS, TypeScript, and MySQL. The platform supports multiple languages and currencies, integrates Google Maps, and was deployed on AWS.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
