I am writing to apply for the Copywriter Corporate Communications (gn) position at Bikeleasing-Service GmbH & Co. KG. The role's focus on clear, brand-consistent language across internal and external channels, combined with the thoughtful use of AI and digital tools, aligns well with how I approach communication in technical environments.

In my work as a software engineer, I have regularly translated complex technical concepts into clear, actionable messages for diverse audiences. Whether writing API documentation, project briefs for stakeholders, or internal updates for cross-functional teams, I prioritize clarity, consistency, and audience awareness. I understand how to adapt tone and structure depending on the channel and the reader.

One area that particularly interests me is using AI and digital tools to support text processes without replacing editorial judgment. I have practical experience integrating AI assistants into workflows, training models on domain-specific data, and ensuring output quality through careful review. I apply the same principle here: technology supports the work, but human judgment drives the final result.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
