I am writing to apply for the Teamleitung Abrechnung & Konditionsmanagement position at Franke + Pahl Fachkr^fte GmbH. While my professional background is in software engineering, I bring strong analytical capabilities, process optimization experience, and a structured approach to problem-solving that I believe would be valuable in managing complex billing and condition management workflows.

Through my work as a Web Developer, I have developed a systematic approach to handling complex data, identifying discrepancies, and building reliable reporting systems. I regularly worked with databases, financial data flows, and reporting tools that required careful attention to accuracy, consistency, and clarity. These skills translate directly to the responsibilities of steering billing processes, reviewing contractual conditions, and creating meaningful reports.

One area that particularly interests me is the opportunity to analyze and optimize existing commercial processes. In my previous roles, I frequently evaluated workflows, identified inefficiencies, and implemented improvements that increased transparency and reduced errors. I am comfortable working across departments, coordinating with different teams, and ensuring that processes run smoothly and reliably.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my analytical and process-oriented skills could contribute to your team in Kiel.

Sincerely,

Md Shahanur Islam Shagor
