I am writing to apply for the Social Media Praktikant/Werkstudent position at Teaching Finance GmbH & Co. KG. Teaching Socials' approach to building personal brands in the finance and real estate space through high-impact content is exactly the kind of environment where I want to contribute and grow.

I understand that creating content that stops people from scrolling requires more than just technical skill. It requires a feel for timing, format, and audience psychology. I have spent time studying why certain hooks, storylines, and formats perform well on TikTok, Instagram, and YouTube. I am comfortable writing scripts, developing new content ideas, and working on shoots. I am also ready to appear in front of the camera when needed.

What draws me to this role is the emphasis on real responsibility from day one. I am not looking for a position where I simply follow instructions. I want to contribute ideas, test formats, and see what actually drives engagement and growth. I work best in environments where creativity and ownership are encouraged, and where the team moves fast and learns from what works.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to the Teaching Socials team.

Sincerely,

Md Shahanur Islam Shagor
