I am writing to apply for the Go-to-Market Manager position at Mendato GmbH. Your mission to help cleaning businesses digitize and streamline their operations through smarter software is a compelling challenge. I am drawn to the opportunity to drive market launches and shape how your product reaches its target audience.

My professional experience as a full-stack developer has given me a strong understanding of how software features are built, tested, and prepared for release. I have worked on planning and implementing feature rollouts for web applications, coordinating between development and business needs to ensure smooth launches. This technical perspective allows me to bridge the gap between product teams and marketing efforts effectively.

In previous work, I have been responsible for creating content across multiple channels, including writing copy for websites, ads, and newsletters. I have also produced video and image assets for social media platforms, using tools like Figma for design and layout. I am comfortable managing social media accounts and developing content strategies that align with product goals.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the chance to discuss how my background in software product launches and content creation can support Mendato’s growth.

Sincerely,

Md Shahanur Islam Shagor
