I am writing to apply for the Go-to-Market Manager position at Mendato GmbH. Your mission to help cleaning companies digitize their operations through smarter workforce planning, invoicing, time tracking, and controlling is a practical and valuable use of technology. I find it interesting how you are applying software solutions to a traditional industry.

My background is in full-stack software engineering, where I have spent over four years building and launching digital products. I have experience planning feature rollouts, creating documentation, and supporting go-to-market campaigns for new software releases. I understand the full lifecycle of a product from development to market introduction.

In previous work, I collaborated with stakeholders to plan and execute launches for new software features. I created technical and non-technical content for websites, newsletters, and social media channels. I also supported lead generation efforts by producing clear, targeted copy for ads and marketing materials.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my product launch and content creation experience can support Mendato’s growth in Berlin.

Sincerely,

Md Shahanur Islam Shagor
