I am writing to apply for the Junior Account Manager B2B position at SalesViewer GmbH. Your approach to transforming anonymous website traffic into measurable sales opportunities is a genuinely intelligent product, and I find the intersection of sales intelligence and go-to-market strategy compelling.

Although my professional background is in software engineering, I have spent years working directly with clients and stakeholders in a B2B context. In my role as a Web Developer at Explo-IT, I was responsible for understanding client requirements, presenting technical solutions, managing expectations, and ensuring successful delivery. This experience has given me a solid foundation in professional communication, active listening, and relationship building.

What draws me to this role is the structured learning curve you offer. I am someone who learns best by doing, and I am ready to start with qualifying inquiries, conducting initial conversations, and learning how to deliver product demonstrations that address real business needs. I am intellectually curious about how companies operate and what drives their purchasing decisions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background and motivation align with what you are looking for. Thank you for considering my application.

Sincerely,

Md Shahanur Islam Shagor
