I am writing to apply for the Werkstudent/in Content Creation position at CAPULET Jewelry. Your brand's commitment to handcrafted, non-mass-produced jewelry from Munich resonates with me, and I am drawn to the opportunity to help bring your authentic story to life on social media.

Although my primary expertise is in software engineering, I have a genuine interest in social media trends and content creation. I am comfortable and natural in front of the camera, and I enjoy developing creative formats and storytelling approaches. I am fluent in German and English, enabling me to connect with your audience in both languages.

I am currently pursuing a Bachelor's degree in Software Engineering at Voronezh State University of Forestry and Technology in Russia. This academic background has instilled in me a disciplined, reliable, and self-starting work ethic. I am eager to bring my creativity and initiative to your team, contributing to content planning, trend testing, and on-camera presentations.

In addition to my technical and creative interests, I work effectively in collaborative environments and communicate clearly with team members. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy working in international settings.

I have attached my CV for your review. I am enthusiastic about the possibility of contributing to CAPULET Jewelry's growth and would be delighted to submit a short video introduction as requested.

Sincerely,

Md Shahanur Islam Shagor
