I am writing to apply for the ISB Informationssicherheitsbeauftragter position at GECKO mbH. Your company's focus on modern IT infrastructure, cloud technologies, and secure software development aligns well with my technical background and research interests in cybersecurity.

Through my research and development work in cybersecurity, I have focused on building secure communication protocols, implementing encryption mechanisms, and designing resilient systems. My work on the Privacy-Preserving Blockchain Framework for Autonomous Vehicles involved integrating Zero-Knowledge Proofs and post-quantum cryptography to ensure data integrity and anonymity. This experience has given me a solid foundation in risk analysis, secure system design, and the practical application of security standards.

In my professional experience as a Web Developer, I have implemented role-based access control, secure authentication systems, and data protection measures in production applications. I have worked with Linux servers, Docker, Nginx, and cloud platforms, giving me a strong understanding of IT infrastructure and software development processes. I am comfortable translating security requirements into concrete technical measures across the development lifecycle.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am confident that my analytical mindset, combined with my hands-on experience in secure system development, would allow me to contribute meaningfully to your ISMS and ISO 27001 certification efforts. I have attached my CV for your review and look forward to discussing how I can support GECKO mbH in strengthening its information security posture.

Sincerely,

Md Shahanur Islam Shagor
