I am writing to express my interest in the Steuerberater position at Taxtalente.de for a partner firm in Adelmannsfelden. While my professional background is in software engineering rather than tax consulting, I bring a strong foundation in analytical thinking, complex system optimization, and digital workflow design that aligns well with the modern, digitally-oriented environment your partner firm offers.

Through my work as a full-stack and AI engineer, I have developed a methodical approach to problem-solving and a deep appreciation for precision and accuracy. Building secure, scalable systems requires careful attention to detail, rigorous testing, and a commitment to delivering reliable results. These are the same qualities that are essential in tax consulting, where accuracy in financial reporting and compliance is critical.

One area that particularly interests me is the opportunity to work in a firm that values digital processes and modern tools. I have extensive experience designing and implementing digital workflows, automating repetitive tasks, and building systems that improve efficiency and reduce errors. I am confident I can contribute to streamlining internal processes and supporting the firm’s digital transformation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to discuss how my analytical skills, digital expertise, and commitment to quality could contribute to your partner firm. Thank you for considering my application. I have attached my CV for your review.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
