I am writing to apply for the Freelance Tˆ'cnico Audiovisual Sevilla position at OpenWebinars. Your focus on transforming raw video content into polished, engaging learning experiences through post-production and AI-driven innovation is exactly the kind of challenge I find meaningful.

While my primary expertise is in software engineering and AI, I have built systems that directly apply AI to media and content workflows. For example, I developed an AI-powered real estate platform that uses OpenAI and Replicate APIs for intelligent image processing and AI assistant interactions. This experience in integrating AI into practical applications aligns with the role's requirement for generating audiovisual material with AI.

What stands out to me about OpenWebinars is the opportunity to work in the technology training sector, where the content you produce directly helps professionals grow. The freelance, project-based structure suits my working style well. I am comfortable managing my own schedule, delivering on deadlines, and maintaining high quality standards without constant supervision.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in AI and software engineering can contribute to OpenWebinars' audiovisual projects.

Sincerely,

Md Shahanur Islam Shagor
