I am writing to apply for the Creative Director YouTube role at Flick. Your mission to build the future interface for professional AI-native filmmaking is genuinely interesting to me, and I appreciate how Flick brings together technology and artistry.

As a Full-Stack and AI Engineer, I have built AI-powered applications that integrate OpenAI and Replicate APIs for image processing and content generation. In one project, I developed an AI-powered real estate platform that used trained AI assistants and image processing pipelines. This technical experience gives me a practical understanding of how AI tools can be used to create compelling visual content.

What stands out to me about this role is the opportunity to own YouTube content from idea to publication. I am comfortable working independently, researching trends, scripting, and iterating based on performance data. I understand what makes people click and keep watching, and I am willing to test ideas, analyze results, and adjust direction when needed.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the chance to discuss how I can contribute to Flick’s YouTube strategy.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
