I am writing to apply for the Regional Training Supervisor position at Guild Garage Group. Your approach to training as a strategic driver of growth and consistency aligns with how I think about building capability within teams. I am drawn to the opportunity to help shape learning experiences across a rapidly expanding network.

My professional background is in software engineering, where I have spent over four years working across full-stack development, system architecture, and AI-driven projects. While this role is not technical, the skills I have developed in communication, cross-functional collaboration, and structured problem-solving are directly transferable. I have worked closely with stakeholders, mentored junior developers, and led knowledge-sharing sessions that improved team workflows and code quality.

One area where I have consistently added value is in identifying gaps and creating practical solutions. In my previous work, I regularly assessed team needs, designed documentation and onboarding materials, and facilitated sessions to help others adopt new tools and workflows. I am comfortable working 1:1 or in groups, adapting my approach based on the audience, and following through on commitments.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my coaching mindset, organizational skills, and adaptability to Guild Garage Group. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your training and development team.

Sincerely,

Md Shahanur Islam Shagor
