I am writing to apply for the Online Bidder position at Digitex Technologies. With a strong background in full-stack web development and mobile applications, combined with years of remote collaboration and client-facing experience, I am well positioned to identify, bid on, and win relevant projects across the IT services categories you serve.

What stands out to me about this role is the need to combine technical understanding with persuasive writing and client relationship management. As a full-stack developer who has built and deployed production applications using Laravel, Next.js, React, Node.js, and Flutter, I can evaluate project requirements accurately and write proposals that demonstrate genuine technical depth. This helps build trust with clients from the first message.

In my previous work as a Web Developer at Explo-IT and DataSoft LTD, I collaborated closely with stakeholders to understand project scope, timelines, and deliverables. I also communicated directly with clients on freelance engagements, translating their needs into clear technical proposals and project plans. This experience directly maps to the responsibilities of managing Upwork profiles, writing tailored proposals, and maintaining strong client relationships.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Digitex Technologies' client acquisition goals. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
