I am writing to apply for the Paid Media Specialist Meta & Google Ads position at Noventra Group. Your focus on partner-brand campaign coordination, performance analysis, and structured reporting aligns with my experience in building and optimizing data-driven systems.

Through my work as a full-stack developer, I have built real-time monitoring dashboards and analytics platforms that track key performance indicators, identify issues, and generate clear reports. For example, I developed a server health monitoring system that streams live metrics using Socket.IO, enabling instant visibility into system status and performance trends. This required structured data analysis, practical optimization judgment, and clear reporting of results.

One area that particularly interests me is your emphasis on campaign documentation, performance summaries, and practical recommendations. In my previous development work, I maintained organized records of changes, observations, and outcomes, and communicated technical findings to both technical and non-technical stakeholders. I am comfortable working independently, managing multiple projects, and delivering clear written communication.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background can support Noventra Group’s partner-brand campaigns.

Sincerely,

Md Shahanur Islam Shagor
