I am writing to apply for the Tutor Virtual Matemˆ¡ticas position at Universidad del Valle de Guatemala. Your institution's commitment to academic excellence and student development through personalized guidance and continuous improvement aligns with my own approach to education and technology.

Through my work as a software engineer and my ongoing studies in Software Engineering at Voronezh State University, I have developed strong analytical and problem-solving skills that are directly applicable to academic advising. My experience building full-stack applications has taught me how to break down complex problems, track progress systematically, and communicate clearly with diverse stakeholders.

One area that particularly interests me is the focus on identifying academic risk situations and coordinating interventions. In my professional experience, I have worked on systems that required monitoring user progress, providing feedback, and implementing quality control mechanisms. These skills translate naturally to supporting students through their academic journey.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in engineering, mathematics, and student support can contribute to the success of your academic advising team.

Sincerely,

Md Shahanur Islam Shagor
