I am writing to apply for the Geschˆftsfˆ…hrer / CEO / CFO role focused on Corporate Development, Fundraising, and Unternehmensentwicklung at the telemedicine company represented by Shehzad Akhtar Research & Headhunting. The opportunity to work directly with the founder to shape the next growth phase of a company that has already completed over 500,000 treatments is exactly the kind of strategic challenge I am looking for.

My professional experience has been built around taking full ownership of technical products from concept to deployment. As a Web Developer at Explo-IT, I designed and delivered scalable web applications, built RESTful APIs, implemented authentication and payment systems, and optimized database performance. I worked closely with stakeholders to align technical decisions with business goals, which gave me a practical understanding of how product development connects to company growth.

In addition to my technical work, I have consistently approached projects with an entrepreneurial perspective. I have built platforms that required evaluating trade-offs between cost, scalability, and time-to-market. I have managed deployments on AWS, Google Cloud, and Digital Ocean, and I am comfortable with Linux server administration, Docker, CI/CD pipelines, and monitoring tools like Prometheus and Grafana. This technical foundation allows me to assess infrastructure investments, operational efficiency, and technology-driven growth opportunities with clarity.

I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and communicate effectively across technical and non-technical teams. I enjoy working in cross-cultural environments and am comfortable representing a company to external partners and stakeholders.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to the company’s next stage of development.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
