I am writing to apply for the Projektmanager:in position at Medienagentur Y OHG. Your description of a role that bridges client needs with creative execution, while managing multiple media projects in a collaborative agency environment, aligns well with my professional background.

In my previous work as a Web Developer, I have been responsible for planning, coordinating, and delivering web applications from concept to deployment. This involved defining project scopes, setting realistic timelines, allocating resources, tracking milestones, and managing budgets. I have experience acting as the central communication point between clients and development teams, ensuring that creative ideas are translated into functional, high-quality products.

One area that particularly interests me is the opportunity to structure and optimize internal project management tools and workflows. I have hands-on experience with tools like Git, Docker, and CI/CD pipelines, and I am comfortable creating and maintaining systems that improve team efficiency and transparency. I also regularly prepare briefings, presentations, and project overviews to keep stakeholders aligned.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how my project management and organizational skills can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
