I am writing to apply for the UI/UX & API Entwickler position at Pakajo GmbH. Your vision of building the world's largest comparison and shipping portal for eCommerce, powered by AI-driven tracking tools, aligns closely with the kind of work I enjoy most: combining clean user interfaces with intelligent backend systems.

My professional experience spans full-stack web development with a strong focus on PHP, JavaScript, and modern frontend frameworks. I have built responsive, user-centered interfaces using React, Next.js, and Tailwind CSS, and I have integrated those interfaces with robust APIs built in Laravel and Node.js. I also have hands-on experience working with AI technologies, including OpenAI and Replicate, which I have used to add intelligent features to web applications.

In previous work, I developed an AI-powered real estate platform where I integrated multiple AI assistants for property analysis and used image processing APIs to enhance the user experience. I also built a travel agency platform with multi-language and multi-currency support, ensuring optimal display across devices. These projects required close collaboration with designers and stakeholders to deliver features that were both functional and visually polished.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Pakajo's team and help build the future of eCommerce shipping.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
