I am writing to apply for the Social Media Creator / Content Specialist role at Medienagentur Y OHG. Your agency's focus on creative freedom, fast-paced content production, and authentic storytelling aligns with my approach to building engaging digital experiences.

Although my professional background is in software engineering, I have always been deeply involved in digital content creation and social media. I understand the mechanics of platforms like Instagram and TikTok, including what drives engagement, how algorithms favor certain content, and the importance of trend-aware storytelling. I am comfortable with mobile video editing tools and have a strong eye for visual pacing and narrative structure.

What sets me apart is my analytical mindset. I approach content not just creatively but strategically, using data to understand what works and why. I can track KPIs, analyze performance data, and optimize content plans based on real insights. This combination of creative intuition and structured analysis allows me to produce content that is both authentic and effective.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my creativity, adaptability, and structured approach to your team. I have attached my CV for your review and look forward to the possibility of contributing to your agency's projects.

Sincerely,

Md Shahanur Islam Shagor
