I am writing to apply for the Videograf:in / Kameramann:frau position at Medienagentur Y OHG. While my professional background is in software engineering, I bring a strong technical foundation, a structured approach to data management, and a genuine interest in visual storytelling and production workflows.

Through my work as a full-stack developer, I have developed a disciplined approach to organizing, sorting, and managing large volumes of digital assets. I am experienced with Linux-based systems, cloud storage, and data pipelines, which translates directly into efficient handling of raw footage, file organization, and backup management in a production environment.

I am familiar with the Adobe Creative Cloud ecosystem and have worked extensively with design tools like Figma and prototyping software. My experience building responsive, visually polished user interfaces has given me a strong sense of composition, pacing, and aesthetic detail that I believe applies well to video editing and post-production.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to bring my organizational skills, technical adaptability, and creative mindset to your team. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to your projects.

Sincerely,

Md Shahanur Islam Shagor
