I am writing to apply for the Steuerberater (m/w/d) position at Bˆ¶rsing Pohl & Partner Steuerberater Rechtsanwˆlte in Berlin. Your firm's 50-year history and commitment to digitalization in tax consulting caught my attention. I am particularly interested in how you combine traditional expertise with modern, flexible working conditions.

Through my professional experience as a Web Developer, I have focused on building scalable web applications and automating internal processes. I have worked with Laravel, Next.js, React, and Node.js to develop full-stack systems that handle authentication, role-based access control, payment gateways, and real-time features. This technical foundation has given me a practical understanding of how digital tools can reduce manual work and improve operational efficiency.

One area that particularly interests me is your emphasis on automation in accounting to reduce monotonous tasks. In my previous work, I developed an AI-powered financial application that automated data processing, integrated with external services, and generated PDF reports. This project required building secure APIs, managing cloud infrastructure on AWS, and ensuring reliable data flow between systems. I believe this experience directly supports your goal of further digitalizing internal processes.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in software engineering and process automation can contribute to your team.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
