I am writing to apply for the Software Engineer (Frontend) - Intern position at Heidi Systems. Your work on building the data infrastructure layer for buildings and energy is tackling a genuinely important and underserved market, and I would welcome the chance to contribute to that mission.

My frontend development experience is built on a foundation of TypeScript, Tailwind CSS, and modern JavaScript frameworks. I have worked extensively with Next.js, which shares core concepts with SvelteKit including server-side rendering, routing, and load functions. I write strict, idiomatic TypeScript and am comfortable working in Unix-based environments. I also have experience with testing tools like Jest and PHPUnit, and I am quick to adapt to new testing frameworks like Vitest.

Through my professional experience as a Web Developer, I have built and maintained full-stack applications where I owned features from UI implementation to API integration. I have worked with real data, debugged issues across the full stack, and focused on delivering reliable, performant interfaces. I am used to collaborating closely with teams and taking ownership of what I build.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Heidi Systems.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
