I am writing to apply for the Steuerfachangestellter / Steuerfachwirt / Bilanzbuchhalter position at CONSULTIA STEUERBERATUNGSGESELLSCHAFT MBH. Your firm's focus on high-quality tax and business consulting, combined with a strong commitment to digital processes and paperless workflows, stands out to me. I am particularly interested in how your team actively seeks efficiency gains through digitalization and automation.

My professional background is in software engineering, where I have spent over four years building and optimizing digital systems. I have worked extensively with Laravel, Next.js, React, and Node.js to develop scalable web applications and RESTful APIs. I have also deployed and maintained applications on Linux servers using Docker, Nginx, and CI/CD pipelines. This technical foundation gives me a practical understanding of how to design and implement efficient, automated workflows.

One area that particularly interests me is process optimization through digital tools. In my previous roles, I have built real-time features using WebSockets, integrated third-party services, and optimized database performance through query tuning and caching strategies. I am comfortable working with MySQL, PostgreSQL, and Redis, and I understand how data integrity and system reliability are critical in any professional environment.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application. I look forward to the possibility of contributing to your team.

Sincerely,

Md Shahanur Islam Shagor
