I am writing to apply for the Prˆ…fungsleiter / erfahrener Prˆ…fungsassistent position at Nickel GmbH. Your firm's focus on digitalization and modern working environments in the auditing space caught my attention, and I believe my technical background can contribute to your team's efficiency and tooling improvements.

Through my work as a software engineer, I have developed strong analytical and problem-solving abilities that are directly applicable to audit processes. My experience includes working with complex systems, ensuring data integrity, and maintaining high quality standards in all deliverables. I am comfortable taking responsibility for end-to-end workflows and reporting on outcomes.

One area where I can add value is in your digitalization efforts. I have hands-on experience with Linux server management, Docker containerization, CI/CD pipelines, and cloud infrastructure on AWS and Google Cloud. I am also proficient with databases like MySQL and PostgreSQL, which would support your documentation and data analysis needs.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills could support Nickel GmbH's continued success. Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
