I am writing to apply for the Auszubildender zum Steuerfachangestellten position at Kohnle & Partner. Your focus on modern technology, digital processes, and thorough training caught my attention, and I am interested in starting my career in a firm that values both professional growth and team culture.

As a Software Engineering student with hands-on experience in building digital platforms, I bring strong analytical thinking and a structured approach to problem-solving. I have worked with databases, automated workflows, and digital tools, which gives me a practical understanding of how technology supports efficient business operations.

What stands out to me about Kohnle & Partner is the emphasis on digital transformation and high-quality work. I am comfortable learning new systems quickly and am genuinely interested in understanding tax and accounting processes from the ground up. I am not afraid to ask questions, and I take pride in delivering accurate, well-organized work.

In addition to my technical background, I work well with people and communicate clearly. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in diverse teams. I am looking for an apprenticeship where I can develop real expertise, and I am ready to commit to the learning and responsibility this role requires.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Md Shahanur Islam Shagor
