I am writing to apply for the Auszubildender zum Steuerfachangestellten position at Kohnle & Partner. Your firm's commitment to modern technology, digital processes, and thorough training caught my attention. I am looking for a structured apprenticeship where I can develop practical skills in tax and accounting while contributing to a professional team.

As a software engineering student with a background in building full-stack applications, I bring strong analytical thinking, attention to detail, and comfort with digital tools. I have worked with databases, spreadsheets, and reporting systems in my projects, which has given me a solid foundation for handling financial data accurately.

I am particularly interested in the digital transformation aspect of this role. In my previous work, I have supported process improvements and adopted new technologies quickly. I am confident I can assist your team with digitizing workflows and maintaining high-quality standards in tax preparation and bookkeeping.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am eager to learn from experienced professionals at Kohnle & Partner and contribute to your team's success. I have attached my CV for your review and would welcome the opportunity to discuss my application further.

Sincerely,

Md Shahanur Islam Shagor
