I am writing to apply for the Auszubildender zum Steuerfachangestellten position at Kohnle & Partner. Your firm's reputation for combining modern technology with traditional tax expertise is particularly appealing to me. I am looking to build a long-term career in tax and accounting, and I believe your structured apprenticeship program offers the ideal foundation.

Although my professional background is in software engineering, I have developed strong analytical and problem-solving abilities through my technical work. I am comfortable with numbers, enjoy working systematically, and have a high standard for accuracy in everything I do. These skills transfer directly to tasks like preparing tax returns, handling financial bookkeeping, and reviewing official correspondence.

What draws me to Kohnle & Partner is your emphasis on digital processes and modern technology. Having worked extensively with digital tools and systems, I am well-prepared to support your digital transformation initiatives. I am confident I can quickly adapt to your workflows and contribute meaningfully from an early stage.

I am a communicative person who enjoys working with people and takes initiative. I am open to learning new fields, and I am ready to apply the same discipline and attention to detail that I used in software development to mastering tax and accounting procedures.

In addition to my technical experience, I work effectively across teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your team during this apprenticeship.

Sincerely,

Md Shahanur Islam Shagor
