I am writing to apply for the Inhouse IT Consultant / Systeminformatiker position at Kohnle & Partner. Your firm's focus on digitalization, automated workflows, and in-house IT solutions aligns well with my background in system administration and infrastructure management.

Through my professional experience, I have developed strong skills in Linux server administration, Docker containerization, and web server configuration with Nginx and Apache. I have set up and maintained CI/CD pipelines, managed cloud deployments on AWS and Google Cloud, and ensured system stability and security. I am comfortable working with network configurations, monitoring tools, and providing 2nd-level technical support.

One area that particularly interests me is the use of AI tools to optimize IT and support processes. I have hands-on experience integrating AI capabilities into applications, including building AI-powered assistants and automation workflows. I am confident I can contribute to your goal of using innovative tools to improve efficiency.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to Kohnle & Partner's IT landscape.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
