I am writing to apply for the Client Partner / Senior Account Director Digital Solutions position at Virtual Identity AG. The role's focus on owning client relationships, driving commercial growth, and acting as a trusted advisor for digital transformation aligns directly with how I have worked throughout my career.

What draws me to this opportunity is the emphasis on building genuine client partnerships rather than managing operational delivery. In my previous roles as a Web Developer at Explo-IT and DataSoft LTD., I was never just a developer executing tickets. I worked closely with stakeholders to understand their business challenges, translated technical complexity into clear value propositions, and consistently helped clients turn their digital goals into working solutions. I am comfortable being the person clients call first.

One area that particularly interests me is the requirement to uncover real business challenges along a client's digital journey. Through my work building full-stack platforms using Laravel, Next.js, React, and cloud services, I have developed a strong ability to listen closely, identify what truly matters to a client, and align technical delivery with commercial outcomes. I understand that growth comes from trust, not just from delivering projects.

In addition to my technical and client-facing experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in client relationships and digital solutions can contribute to Virtual Identity AG's continued success.

Sincerely,

Md Shahanur Islam Shagor
