I am writing to apply for the Werkstudent Social Media Kommunikation & PR position at rlvnt GmbH. Your focus on integrating artificial intelligence into strategic communication is particularly interesting to me, as I have been working at the intersection of software engineering and AI-driven solutions.

What stands out to me about rlvnt AI is the combination of long-standing communication expertise with practical technological implementation. As a Full-Stack and AI Engineer with experience using tools like ChatGPT and other AI models, I understand how to leverage these technologies to create effective content, presentations, and communication workflows. My technical background allows me to not only use AI tools but also understand their underlying mechanisms and limitations.

Through my project work, I have developed platforms that require clear, audience-specific communication. For example, building the Travel Agency App involved creating multi-language, multi-currency interfaces and content management systems that serve diverse user groups. This required a strong sense of language, tone, and how to present information clearly for different channels and audiences.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I am a reliable, structured worker who takes ownership of tasks and thinks proactively. I am eager to bring my understanding of AI, design, and communication to support your team in social media, PR, and client projects. I have attached my CV for your review and welcome the opportunity to discuss how I can contribute to rlvnt AI.

Sincerely,

Md Shahanur Islam Shagor
Full-Stack Developer & AI Engineer
