I am writing to apply for the Mediengestalter Digital position at StraightAds Marketing GmbH. Your focus on data-driven performance marketing and strong creatives aligns with my experience building digital assets that balance visual quality with measurable results.

Through my work as a Web Developer, I have designed and implemented responsive landing pages, hero visuals, and web assets using Figma, HTML, CSS, Tailwind CSS, and JavaScript. I understand that in a performance context, design must serve conversion goals, not just aesthetics. I have iterated on UI components based on user feedback and performance data, similar to the A/B testing approach your team uses.

I have practical experience using AI tools to accelerate design workflows. I use image generation and language model tools to speed up routine tasks like creating mockups, generating design variations, and refining copy, while keeping full creative control over the final output.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. I would welcome the opportunity to discuss how I can contribute to StraightAds' creative team.

Sincerely,

Md Shahanur Islam Shagor
