I am writing to apply for the Chief Operating & Sales Officer position at lively Holding GmbH. Your mission to modernize assisted living through community-driven, high-quality senior residences is genuinely compelling, and I am drawn to the opportunity to help scale a concept that has already proven itself in Gronau and Duisburg.

My professional background is in software engineering, but the nature of my work has always been deeply entrepreneurial. Over the past four years, I have built and deployed full-stack platforms from scratch, taking projects from initial concept through to production deployment, user onboarding, and ongoing iteration. At Explo-IT, I was responsible for the complete lifecycle of web applications, including architecture design, API development, database optimization, and server management on Linux environments using Docker, Nginx, and CI/CD pipelines. This required the same kind of operational thinking, process building, and cross-functional coordination that this role demands.

What stands out to me about lively is the emphasis on hands-on execution and building scalable structures without losing sight of the human element. I have worked in small, fast-moving teams where I had to wear multiple hats, communicate directly with stakeholders, and make decisions that balanced quality with speed. I am comfortable taking ownership of operations, identifying growth opportunities, and building systems that support expansion, whether that means setting up new workflows, managing technical infrastructure, or coordinating with remote and on-site teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments. I am ready to relocate to NRW and be present at your locations as the role requires.

I have attached my CV for your review. I would welcome the chance to discuss how my operational mindset and hands-on experience can contribute to lively’s next phase of growth.

Sincerely,

Md Shahanur Islam Shagor
