I am writing to apply for the Qualitˆtsmanager/in und Regulatory Affairs position at Hˆnsler Medical GmbH. Your company's long-standing reputation in manufacturing high-quality medical devices for complementary medicine, combined with a science-driven approach to product development, is genuinely impressive.

Through my professional experience as a software engineer, I have developed strong project management skills and a disciplined approach to documentation, process improvement, and cross-team coordination. I have worked closely with quality assurance, production, and development teams, ensuring that technical documentation remains accurate, up-to-date, and audit-ready.

One area that particularly interests me is the preparation and execution of audits. In my previous work, I have supported internal and external audit processes by maintaining clear records, tracking corrective actions, and ensuring compliance with documented procedures. I am comfortable working as a liaison between quality management, production, and regulatory bodies.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my background in structured project management and quality-focused documentation can contribute to Hˆnsler Medical's regulatory and quality objectives.

Thank you for your time and consideration.

Sincerely,

Md Shahanur Islam Shagor
