I am writing to apply for the Asset Management Specialist Water Wastewater Treatment position at Woodard & Curran. Your work in clean water, environmental stewardship, and employee ownership creates a compelling mission, and I am interested in contributing to your Operations & Management team.

My background is in software engineering and data analysis, with a focus on building systems that require careful data collection, organization, and reporting. I have experience working with databases, analyzing performance data, and identifying trends to support decision-making. These skills align with the analytical and system-oriented responsibilities of this role.

One area that particularly interests me is the use of data to drive asset lifecycle strategies and maintenance forecasting. In my previous work, I have built systems that track and analyze operational data, generate reports, and support planning processes. I am comfortable working with complex datasets and translating them into actionable insights for cross-functional teams.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
