I am writing to apply for the Social Media Manager TikTok and Founder role at Once Upon a Farm. Your mission to drive systemic improvement in childhood nutrition through organic, accessible food is meaningful, and I appreciate the focus on building authentic, platform-native content that resonates with Gen-Z and millennial families.

My professional experience is in software engineering, where I have designed and delivered full-stack web and mobile applications from concept to deployment. I have built platforms that serve multiple user roles, integrate real-time features, and handle complex workflows. This background has given me a strong sense of ownership, the ability to manage end-to-end product cycles, and the discipline to make data-informed decisions.

One area that particularly interests me is the dual mandate of this role: building Once Upon a Farm's TikTok presence while also developing content for the founders. In my work, I have created systems that serve both broad audiences and specific stakeholders, balancing brand consistency with authentic, individual voices. I am comfortable working directly with senior team members and adapting quickly to their communication styles and schedules.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review. Thank you for considering my application.

Best regards, Md Shahanur Islam Shagor

Sincerely,

Md Shahanur Islam Shagor
