I am writing to express my interest in the Assistente Financeiro position at Sicoob. While my professional background is in software engineering, I bring strong analytical, process-oriented, and problem-solving skills that are directly applicable to financial reconciliation and operational workflows.

Through my work developing an AI-powered financial application, I gained hands-on experience handling financial data, automating data processing, and ensuring accuracy in financial transactions. I built the backend using Express, TypeScript, and MongoDB, integrated AWS services for authentication and document generation, and worked with financial data flows that required precision and attention to detail.

In my professional experience as a Web Developer, I designed and maintained scalable web applications using Laravel and Next.js, built RESTful APIs, optimized database queries, and implemented secure authentication and payment systems. These projects required me to analyze processes, identify inconsistencies, and implement reliable solutions.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and welcome the opportunity to discuss how my analytical and technical skills can contribute to the financial operations team at Sicoob.

Sincerely,

Md Shahanur Islam Shagor
