I am writing to apply for the Chief Operating & Sales Officer position at lively Holding GmbH. Your mission to redefine assisted living through modern, community-focused senior residences is a meaningful one, and I am drawn to the challenge of scaling a young brand from proof of concept to broad market presence.

My professional background is in full-stack software engineering, where I have spent over four years building and delivering production systems. In my most recent role, I was responsible for the complete lifecycle of web applications, from system design and API development to deployment and client communication. This required me to think not just as an engineer, but as a builder who understands that technology is a tool for solving real operational problems.

One area that particularly interests me is the operational and strategic side of scaling a business. In my previous work, I have built platforms that serve multiple user roles, integrated payment systems, set up real-time monitoring dashboards, and managed deployments on cloud infrastructure. These experiences have given me a practical understanding of how to build processes that are both scalable and reliable, which I believe translates well to the operational challenges lively is facing as it expands.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I understand that this role requires a hands-on, entrepreneurial leader who is comfortable with both strategy and execution. While my domain experience is in technology rather than senior care, I bring a strong track record of taking ownership, building systems from the ground up, and driving projects to completion. I am ready to bring that same energy and discipline to lively. I have attached my CV for your review and would welcome the opportunity to discuss how I can contribute to your next growth phase.

Sincerely,

Md Shahanur Islam Shagor
