I am writing to apply for the CAD Assistant (Part-time) position at RecruitGo Careers. Your focus on connecting global talent with meaningful remote opportunities aligns well with my own experience working across international teams and delivering precise technical work.

Although my professional background is primarily in software engineering and full-stack development, I bring strong attention to detail, experience with technical documentation, and a methodical approach to revision management. I am comfortable working within structured workflows and collaborating closely with design teams to ensure accuracy across project life cycles.

In previous roles, I have worked extensively with version control, documentation, and iterative revision processes. These experiences have trained me to maintain clarity and precision in technical outputs, which I understand is critical for preparing system design drawings, transposing layouts, and creating As-Built documentation.

In addition to my technical experience, I work effectively across multidisciplinary teams and communicate clearly with both technical and non-technical stakeholders. I am fluent in Bengali and English, have working knowledge of Russian and Hindi, and enjoy collaborating in international and cross-cultural environments.

I have attached my CV for your review and would welcome the opportunity to discuss how my skills can support the RecruitGo design team.

Sincerely,

Md Shahanur Islam Shagor
